Summary

I lead design for complex product systems, turning research into product decisions and shared models into shipped interfaces. Across marketplaces, education, commerce, and internal tools, I help teams clarify direction, work through constraints, and carry decisions into delivery.

Experience

Senior UX Designer, Renaissance Learning
Jul 2024 – Present · Remote

- Led UX strategy and end-to-end design for K-12 classroom experiences across Renaissance Intelligence.
- Directed the design and launch of Renaissance Intelligence and contributed reusable patterns to the design system.
- Championed Object-Oriented UX across design and engineering to strengthen shared product models and team alignment.

Senior UX Designer, Indeed
Oct 2022 – Jul 2024 · Remote

- Designed Job Refresh, owning information architecture, interaction design, messaging, prototypes, and stakeholder alignment; it became part of Sponsored Jobs after six months of free availability.
- Addressed employers' closing-and-reposting workaround with a flow requiring substantially updated job information; employers reported less time and effort than reposting.
- Founded and operated a cross-functional UX working group to test, refine, and teach design methods company-wide.

Senior Product Designer II, Redfin
Feb 2022 – Sep 2022 · Remote

- Influenced product roadmap and strategy by delivering user research that realigned business priorities toward customer-first features.
- Conducted discovery and tactical research to identify user needs and business opportunities.
- Supported hiring, onboarding, and growth of design team talent.

Staff UX Designer, The Home Depot
Oct 2018 – Feb 2022 · Atlanta, GA

- Designed curbside communication for a 60-day, 50-store pilot that reported about 90% of customers saying their order arrived when expected, 3.8-minute pickup with ETAs versus 4.5 without, and

fulfillment-change calls under 10% versus a 30%+ baseline.
- Designed item-level price adjustments, piloted in 50 stores before chain-wide rollout. Reviews at 30, 60, and 90 days reported faster transactions, reduced shrink, stronger SOP adoption, and greater associate empowerment; exact figures are unavailable.
- Designed enterprise tools for merchandising, store systems, and HR with cross-functional product and engineering teams.
- Planned and facilitated research to inform product priorities and validate design decisions.
- Championed accessibility in associate tools and led workshops for designers, product owners, and engineers.

Senior Product Designer, Snap! Mobile
Jan 2018 – Oct 2018 · Seattle, WA

- Led end-to-end design in agile, cross-functional teams, supporting a portfolio of fundraising products.

UX Designer II, Amazon
Aug 2016 – Dec 2017 · Seattle, WA

- Redesigned the first A-to-z claim notification. In the 60 days after the U.S. update, 88% of sellers who opened the email felt confident they could avoid future claims, related Seller Support call volume fell 14%, and seller-initiated refunds trended toward a 30% year-over-year increase.
- Designed end-to-end seller tools for the Amazon Marketplace, improving onboarding and engagement.

UX Lead, HP Inc.
Sep 2015 – Aug 2016 · Alpharetta, GA

- Contributed to the Grommet design system, enhancing accessibility and reusability across HP products.

Senior UX Designer, AT&T
Jul 2011 – Aug 2015 · Atlanta, GA

- Designed mobile and responsive experiences for customer-facing digital platforms.

Education

Full Sail University — Winter Park, FL · 2009
